

PRESS RELEASE

03 April 2023

index™23: CHT presents innovative fiber auxiliaries as well as coating solutions for nonwovens in Geneva

- DURON fiber auxiliaries
- TUBICOAT, TUBIGUARD coating products

Nonwovens are ubiquitous in our daily life and society. We enjoy the benefits of those sophisticated and versatile textiles but we are often unaware of their presence. They can be found in baby diapers, crop covers, insulation, roofing, air and liquid filtration, gowns, drapes and plenty other different uses. With those end-use applications there is the need for high-end, efficient and innovative machineries with high production capacities to yield e.g. drylaid, spunlaid, meltblown, needlepunched, hydro-entangled and thermobonded nonwovens.

We, as CHT, support the nonwoven industry by providing with our DURON fiber auxiliary range indispensable process agents and smart chemistry to functionalize nonwovens to meet the increasing machinery producers, market, customer and regulatory demands. Additionally, we consistently integrate aspects of sustainability into our actions. We understand future sustainability trends and derive appropriate measures for our business. Sustainability remains deeply anchored in our company strategy. Energy and climate protection, portfolio management, supply chain responsibility, staff commitment and resource efficiency as well as responsible production are the focal points of our sustainability management.

Our permanent hydrophilic products for fibers and nonwovens used in absorbent hygiene products offer softness, for comfortable wear, excellent transfer of the liquid from topsheet to the acquisition distribution layer and subsequently to the diaper core to guarantee a dry and healthy skin. Our products also support the need for long term hydrophilic performance, especially after storage, and the upcoming demand for biobased raw materials.

Circular economy represents a very important driver of new innovative product developments. CHT is increasingly developing product solutions that can be declared as unmixed with the finished goods and thus do not interfere with the recycling process.

At **index™23 in Geneva** CHT Group presents **from April 18 to 21** its versatile portfolio of fiber auxiliaries and coating products.

Come and visit us at our **Booth 1259** and convince yourself of our innovative products. There we can also discuss your individual application profiles and present you our specific offer in the field of functionalization of textile materials.

About the CHT Group

The CHT Group is a medium-sized global player for specialty chemicals and active worldwide in development, production and sales. CHT Germany GmbH in Tübingen is the headquarters of the group of companies which focuses on sustainable chemical products and process solutions.

TEXTILE SOLUTIONS of CHT improve the quality, functionality as well as look and purity of textiles and optimize their manufacturing processes.

In the fields of silicones, building materials, paints, coatings, leather, release agents, paper, agrochemicals, mining as well as cleaning and care products innovative products and process solutions are provided by INDUSTRY SOLUTIONS.

By combining the strengths of the complete group further innovative products, applications or processes are continually developed and vast technical support is offered within the SCIENCE & SERVICE SOLUTIONS. Highly qualified specialists work in state-of-the art laboratories for development, analytics and application technique in order to work out ideas and solutions that meet the latest requirements.

The CHT Group with its own production and sales locations is represented by more than 26 companies worldwide. In the financial year 2022, the CHT Group generated a group turnover of 705 million Euro with around 2,400 employees. In 2023, CHT celebrates its seventieth anniversary. Let's celebrate seventy years of Smart Chemistry with Character!
